

# THE M. & L. COAL and WOOD CO.

The People who can and will serve  
you best, we have a large stock of the  
very best kinds of Coal always on hand.

When you need Coal let us advise you

Our Coals are clean and well screened,  
and we treat you right. Prompt de-  
livery and satisfaction guaranteed.

Call Phone 74

## HOLIDAY EXCURSIONS

Via  
OREGON SHORT LINE—  
Union Pacific System.

Tickets on sale between local points,  
December 17, 18, 23, 24, 25 and 31,  
1915 and January 1, 1916; limit  
January 3, 1916.  
Round trip fare:  
LOGAN TO OGDEN .....\$1.95  
LOGAN TO SALT LAKE.....\$2.95

Proportionately low rates to  
other points.

### QUICK DIRECT SERVICE

Consult J. R. Morton,  
Agent, Logan, for  
further details.

### Natural Conclusion.

City Editor—"You interviewed Mrs. Gabbs on the subject, of course?" Reporter—"Well, not exactly. I saw the lady, but she hadn't a word to say." City Editor—"Hadn't a word to say! Why, when did she die?"

### TIMELY HINT ON OVER EATING

Big dinners cause disturbed digestions. The stomach and bowels should not be clogged with undigested poisonous waste matter. Foley Cathartic Tablets relieve distress after eating, stop belching, banish bloating and gas on stomach, regulate the bowels, sweeten the stomach and tone up the liver. Sold everywhere.—Adv.

### END STOMACH TROUBLE, GASES OR DYSPEPSIA

"Pape's Diapepsin" makes Sick, Sour, Gassy Stomachs surely feel fine in five minutes.

If what you just ate is souring on your stomach or lies like a lump of lead, refusing to digest, or you belch gas and eructate sour, undigested food, or have a feeling of dizziness, heartburn, fullness, nausea, bad taste in mouth and stomach-headache, you can get blessed relief in five minutes. Put an end to stomach trouble forever by getting a large fifty-cent case of Pape's Diapepsin from any drug store. You realize in five minutes how needless it is to suffer from indigestion, dyspepsia or any stomach disorder. It's the quickest, surest stomach doctor in the world. It's wonderful.

### HE TRIED THEM ALL.

Redd—Boating is a great sport. Greene—So they told me. "And you tried it?" "Oh, yes; all kinds." "Which did you like best?" "Well, I don't know. You see when I tried sailing half of the time we became becalmed; then I tried a motor boat and the old motor got out of order nearly every trip." "Why didn't you try rowing?" "I did." "Didn't you like that?" "Oh, yes, pretty well but my wife got tired rowing all the time."

Had Many Accomplishes. Judge—Did you commit the burglary alone or with the help of others? Prisoner—With the help of about 5,000 others. Judge—What? Explain yourself. Prisoner—Well, you see, judge, the parade called everybody in the house to the front windows, so I had a clear chance to do me work in the back.—Boston Transcript.

In Liquid Form. Mrs. Casey (belligerently)—Phewer's yer week's wages, an' the rint comin' due tomorrow? Casey—Be aisy, now, woman! Oi lost it troo a hole. Mrs. Casey—In yer pocket? Casey—Naw; it slipped troo a hole in me face.

### JUST AS WELL.

"Will you tell your sister I'm sorry that I will be unable to see her before I go away?" "It's all right. She wasn't going to be in if you called, anyway."

Superiority of the Hog. The hog is far superior To the trotter any day; For while he is a squealer, He nothing gives away.

### Not a Skeptic.

"Do you believe the good die young?" asked the optimistic boarder. "I do," replied the pessimist. "Judging by the poultry served at this joint."

### Not So Pleasant.

"Psychologists say that you are a good man when children like to follow you around." "Much depends on the motive. I've had 'em hoot at me."

### It Sure Is.

Patience—Do you ever look back over the past? Patrice—Why, bless your heart! That's the only way one can look at the past.

### Long Chance.

Church—See they've got a gun now that will shoot 20 miles. Gotham—I wouldn't like to take an absent-treatment chance even on one of those things.

### Drop in Chickens.

Mrs. Styles—I heard something drop in the kitchen a short time ago, Katie. Did you break anything? Katie—Only the legs off the chicken, ma'am.

### AND HAVE A MONOPOLY.

"With all the poets writing street car verse, Pegasus is out of a job." "Who is Pegasus?" "The winged horse." "He might get work towing disabled airships in."

### Pessimistic View.

Woman is born, so man declares, To smooth his linen and his cares; But in this world of push and shuffle, The chances are that both shall rumple.

### Disbarred.

"How do you want your ballroom decorated, madam?" "Any way you like, as long as there are no wallflowers."

## Wintering Poultry

Special Care Should Be Given Fowls During Cold Weather to Obtain Best Results

To obtain good results from a flock of poultry during the winter all the houses and coops should be put in good condition, only healthy fowls placed in the buildings, and good care should be given to the poultry. The houses should be thoroughly cleaned, disinfected and made tight for winter. If the house has a dirt floor, it is well to remove 3 or 4 inches from the top and substitute fresh gravel or sand. If the floor is cement or wood, remove all litter and dirt and put in 4 or 5 inches of fresh straw or litter. Be sure that the house is tight on three sides and that there is no chance for a draft to strike the hens. If hens roost or are placed in a draft during the fall and winter, colds are sure to develop, which may result in roup and other troubles. The south side, or front of the poultry house may be left comparatively open, but should be under control so that the openings may be closed gradually as the weather becomes cold. Have muslin curtains in the front of the house, or leave a window partly open even on the coldest nights to allow some ventilation in the house. Fowls will stand considerable cold air provided it is dry, and ventilation will keep the air thoroughly dry in the house. The pullets should be brought in off the range and put in winter quarters, but before they are mixed with the older fowls be sure that the hens are banded or that the web of the foot is punched in some way so as to distinguish between the pullets and the hens. In this way the older stock may be culled out whenever it appears desirable and the young hens kept for further laying. Cull the chickens which are brought into the laying house carefully, and fatten and market all chickens which are small, poorly developed or in poor condition. These small, poorly developed chickens are apt to catch cold if put in with the other poultry and develop diseases which quickly spread through the flock. Market all surplus cockerels or older male birds which are not desired for breeding or not wanted for a later market. Feed the grain in a deep litter on the floor and make the hens exercise for all of their grain. The mash may be fed either wet or dry, and should be so regulated that the fowls will get about equal parts of mash and of the scratch grains. It is necessary to give the fowls plenty to eat to get good results, but the birds should always be eager for each feed. In cold weather feed about one third of the scratch grains in the morning and two thirds at night. In this way the hens are forced to exercise more than if they receive all the grain they desire at morning feed. Scratch grains, mash or ground grains, animal protein, green feed, grit and shell should be supplied in the winter. A good scratch mixture may be made of equal parts by weight of cracked corn, wheat, and oats; and a mash may be made of two parts corn meal and one part each of wheat bran, wheat middlings and beef scrap. Green feed, such as cabbages, mangel wurzel, beets, cut alfalfa, or sprouted oats, should be supplied to replace the green feed which the fowls have been securing in the fields and beef scrap, skim milk, cut green bone, or some similar feed is needed to replace the bugs which the fowls have been getting on the range. Beef scrap or feed of this nature is very essential in securing a good supply of eggs during the winter months.

Clean the dropping boards at least once a week, and spray the roosts with kerosene or some commercial preparation for killing mites once a month during the winter. Have a good supply of sand or dry dirt on hand to use on the dropping boards during the winter. If any of the birds develop colds, put as much potassium permanganate as will remain on the surface of a dime into a gallon of water and keep this mixture in their drinking water for several days or until the symptoms of the colds have disappeared. Remove any sick birds from the flock as soon as they are noted and treat them in coops by themselves, or kill and bury them if they are not worth treating. Examine the pullets and hens for lice, and dust thoroughly with a good insect powder or apply a mixture of 2 parts of vasoline and 1 part of mercurial or blue ointment, about the size of a pea, 1 inch below the vent of the bird, rubbing the mixture lightly on the skin. An application of this ointment two or three times a year will keep the fowls free from lice. Where insect powder is used, it should be applied three or four times a year, or oftener if the fowls become infested. Provide a small box in the house partly filled with

dry road dust or fine dirt in which the hens may dust, thus helping to keep themselves free from lice.

## Gigantic Biplanes Add One More Terror to War

In the January American Magazine Merle Crowell tells some inside facts about Canada's new giant biplanes: "Dressed up in its armor a Canada is known as a war destroyer; if a garb of peace it would be called an aerial express or an aeroplane of luxury. The general set of the planes resembles that of the original American. In other respects the two machines have hardly a family resemblance. The America is a flying boat; the Canada looks like an armored touring car with enormous wings—provided that one can imagine a touring car with a body sixteen feet long, capable of carrying two men, two guns, and a ton of explosives.

"The upper wing plane of the Canada runs along eighty-five feet eleven feet more than the America. Set midway of the lower plane (which is a little shorter) and hinged tightly to uprights is the cabin or armored touring car. Peeking out from its fore and aft, are Maxim or Lewis aeroplane guns which can fire five hundred shots a minute. Since the cabin spreads out several feet on both sides of the planes, the guns have a full arc of fire.

"On each side of the cabin, where fuselages run back to the rudder, or tail, is set a 160 horse power Curtiss 'V' type motor. The two motors, which run without vibration, drive the stanch mahogany propellers to the tune of ninety miles an hour.

"The Canada's wings are constructed of selected woods and steel wire, cunningly wrought together; in some places they are a foot thick. The ribs are three-ply, gumwood within and two thicknesses of birch without all solidly glued together and reinforced with brass tacks. When they are finished, the planes, like those of all the new warbirds, can absorb shot and shell with the immunity of a professional sword swallower.

"By virtue of the Sperry stabilizer, which has contributed more to the stability of aeroplanes than any other invention, the pilot, if he wishes, may disregard the controls and devote his time to the gentle art of dropping bombs. The stabilizer, with its little gyroscopes rotating at 12 thousand revolutions a minute, looks after things during the bombardment. They claim that a stabilizer makes a plane fool proof.

"A bomb dropping device is hinged to the stabilizer; and by an intricate mechanical device the speed of the machine, the wind drift, and the exact angle of the plane from horizontal are determined with exactness. When the pilot looking thru a sighting glass, sees the object which he wishes to hit he pulls a lever and a bomb drops through the bottom of the machine straight to the mark."

### OUR JITNEY OFFER—

### THIS AND FIVE CENTS

DON'T MISS THIS. Cut out this slip, enclose with five cents to Foley & Co., Chicago, Ill., writing your name and address clearly. You will receive in return a trial package containing Foley's Honey and Tar Compound, for coughs, colds and croup; Foley Kidney Pills, and Foley Cathartic Tablets. Sold everywhere.—Ad.

### Raise 'Em.

"I met some very pretty girls in Delaware when I went there this summer." "Well, you know, Delaware always was famous for its peaches."

### WATCH YOUR PIGS

Much sickness among pigs, says Dr. Frederick, head of the Veterinary Department of the Utah Agricultural College, who travels much throughout the State, "could be avoided by proper methods of handling."

People allow their pigs to run together and burrow into hay and straw stacks. At night all that possibly can, crowd into these holes to sleep where they lie on each other till morning. Here the pigs become hot and sweaty and come out into the cold morning air all steaming and overheated. They chill immediately and often contract influenza and pneumonia which results in serious losses to the owner.

This could be avoided by separating the pigs into small numbers and fencing so they can't burrow under stacks and crawl in where they become too warm.

### MADE OVER AGAIN

Mrs. Jennie Miner, Davidson, Ind., writes: "I can truthfully say Foley Cathartic Tablets are the best I ever used. They are so mild in action. I feel like I had been made over again." They keep the stomach sweet, liver active and bowels regular. They banish constipation, indigestion, biliousness, sick headache. Sold everywhere.—Adv.
